# Ben Ungar

Software Engineer at Westinghouse | C#/.Net | Unity  
Pittsburgh, Pennsylvania, United States

## Summary

I love building new things and working with other passionate individuals! I am a software engineer who is most skilled with C#, Unity, and .Net. I also have exposure to C++, Rust, Python, Java. Thanks for stopping by my profile, feel free to connect, and have a good day!

---

## Experience

Westinghouse Electric Company  
Safety Software I&C Engineer II  
May 2026 - Present (5 months)  
Warrendale, PA

Focused on Tools and Automation using C#/.Net

### Tech Wizards

Software Engineer  
August 2022 - February 2026 (3 years 7 months)

Built Virtual Maintenance Trainers in 3D environments based on provided hardware schematics, in Unity3D. Test the quality of these builds with Unity unit testing and playtesting. Make additions and bug fixes to existing systems written in C#. Write technical documentation for found bugs and other issues in Microsoft Excel.

### Digital Dream Labs

3 years 4 months

Junior Game Programmer  
January 2022 - June 2022 (6 months)  
Pittsburgh, Pennsylvania, United States

For Infinidrive AR development (cancelled project):

Photon multiplayer implementation

Menu functionality

Adaptation of car kits and game mechanics from original Overdrive game.

Intern Game Programmer

March 2019 - December 2021 (2 years 10 months)

Greater Pittsburgh Area

Interned part time during the college semester, and full time in between semesters.

R&D Projects - Unity Programmer, Writer, General Programmer

Monstrous Molecules - Unity Programmer

Collaborated with a small team of developers with different skill sets.

For R&D:

Wrote some dialogue for the Butter Robot

Programmed a custom scraper

Designed and programmed game systems for an unreleased prototype and Infinidrive

Designed and programmed early combat abilities and kits for Infinidrive

Implemented levels for unreleased prototype

For Monstrous Molecules:

Implemented levels based on given blueprints

Designed game systems integral to the gameplay

Scripted game events.

---
